

Senior Developer

Position Description

Paul Consulting Group, an IT solutions provider, is currently seeking a Senior .NET Developer to become part of our development team to develop and release enhancements to multiple enterprise web applications. The successful candidate will have experience developing web applications with object-oriented design techniques utilizing Microsoft development technologies and managing/overseeing other developers. This is a full-time onsite position located in Tallahassee, FL and responsibilities include:

Expectations

- Proven record of accomplishment creating and implementing numerous software solutions utilizing full stack Microsoft .NET frameworks web, API, and database technologies for stakeholders.
- Proven experience implementing system architecture design, defining business requirements, designing workflows, and application interfaces based on customer needs.
- Adhering to established coding methodologies while continuously analyzing processes for improved performance and adaptability.
- Experience working with Agile methodologies such as SCRUM to cultivate and maintain strong relationships within the project team.
- Working closely with leaders in a technology advisement role to bring new ideas, solutions, and technologies to the company.
- Ensure quality of all work products produced by the team.
- Onsite position to ensure mentoring, teamwork, and technology adoption.

Required Experience

- Bachelor's Degree or higher in Computer Science, MIS, IS, or related field.
- 5+ years design and development experience with .NET, C#, ASP.NET, JavaScript Frameworks (jQuery, Angular, React) and SQL Server in an n-tier architecture.
 - Experience working with design patterns- MVC, MVVM, and Object-relational mapping framework- Entity framework.
 - Experience with advanced debugging skills in IDE and browser debuggers
 - C# - Generics, Interfaces, advanced concepts
- 5+ years with relational databases
 - Advanced SQL knowledge
 - Database optimizations/configurations/security
- Experience with website management
 - Microsoft IIS setup- http bindings, headers, application pools
 - Configuration files- web, Json config, environment variable usage
- Experience with DevOps
 - Ensuring code quality- GIT source control, branching strategies, pull requests, code reviews.
 - Setting up Build and Release Pipelines
 - Setting up Branch Policies/security
- 5+ years working in a team environment, overseeing, and mentoring other developers.
